

# What We Want

**Close the Camps** — End the targeting of immigrants. All who have been imprisoned or deported must be free to rejoin their loved ones. Block ICE everywhere they try to terrorize communities.

**Amnesty for All** — Everyone imprisoned for resisting the Trump regime must go free. That includes the brave fighters from the Twin Cities and Los Angeles, the Prairieland defendants, and those captured for resisting the rise of fascism before Trump took office.

**Stop War and Genocide** — Get US troops and weapons out of the Middle East and Latin America. End military support to the Israeli government. Find leverage points via which to respond to threats to murder civilians, seize Greenland, or use nuclear weapons. Take direct action to shut down the arms companies responsible for the genocide in Gaza and the ethnic cleansing of Palestine.

**Fight Tyranny** — Abolish ICE and DHS. These institutions exist to oppress us. Those who have joined or remained in these agencies under Trump have shown their true colors. Any politician who continues to support them is paving the way for totalitarianism.

**Shut Down Techno-Fascism** — Block Flock cameras, data centers, and data harvesting. Plutocrats like Elon Musk and Mark Zuckerberg want to use AI to eliminate jobs, carry out mass surveillance, and massacre entire populations. Let's stop them.

**Give the Class War Two Sides** — Wages have flattened while inflation skyrockets. People can barely afford food, rent, and healthcare while billionaires rack up record profits. Fight back through strikes and acts of mass refusal.

**Build Grassroots Power** — Cultivate mutual aid projects, community education projects, and other social infrastructure outside the state that cannot be gutted by government cuts or threatened by crackdowns on schools and non-profit organizations.

**No Return to Normal** — No political party will do these things for us. We have become able to accomplish them ourselves. We can't win the lives we deserve through elections, neither the midterms nor in 2028. We reject the false promises of a return to the Biden years—the very years that brought Trump back to power. We are fighting for dignity, freedom, and well-being for all. *A life worth living!*
